Overview Electricity supply and demand Transmission and distribution Access to electricity Service quality Responsibilities in the Electricity Sector Renewable energy resources History of the electricity sector The electricity sector in Argentina constitutes the third largest power market in Latin America. It relies mostly on thermal generation (60% of installed capacity) and hydropower generation (36%). The prevailing natural gas-fired thermal generation is at risk due to the uncertainty about future gas supply. Faced with rising electricity demand (over 6% annually) and declining reserve margins, the government of Argentina is in the process of commissioning large projects, both in the generation and transmissio...
