

Bhutan's National Energy Policy 2025 (NEP 2025), released in June 2025 by the Ministry of Energy and Natural Resources (MoENR), represents a pivotal shift in the country's energy strategy.

"With rapid advancements in harnessing Nuclear, Hydrogen, Fusion, Solar, Thermal and Wind energy, hydropower may soon lose its competitive edge and we may become a net energy importer.

Hydropower will remain the backbone, but solar and wind will fill critical seasonal gaps and support domestic electrification. The result? A more resilient, self-sufficient energy ecosystem ...

The Hon"ble Lyonpo of the Ministry of Energy and Natural Resources (MoENR) today officially launched the National Energy Policy 2025 (NEP 2025), following its recent approval by the ...

This integrated approach provides various policy options, in line with the current policies and Vision 2020, for future development of the kingdom. The document contains a number of recommendations.

Enhance the climate resilience of Bhutan's energy sector by diversifying renewable energy generation, distribution and storage options while mitigating climate impacts on infrastructure and services.

Public-Public/Private Partnership (PPP): PPP between Bhutanese Public Sector and Foreign Public/Private Sector. Contd....

While continuing to honour hydropower, the policy moves decisively toward renewable diversification, energy security, climate resilience, and economic transformation to meet Bhutan's ...

By setting ambitious targets for hydropower expansion, embracing pumped storage, diversifying into solar and other renewables, and fostering strategic partnerships, Bhutan aims to ...

For Bhutan, long-term energy security means meeting winter demands when our hydropower generation ebbs to the lowest.
