

As we approach Q4 2025, the UN's SDG7 tracker predicts solar villages could eliminate energy poverty for 300 million people by 2028 . Not bad for technology that was considered "too rural" just a decade ...

Today, with over 100 solar installations, the village uses the sun to power homes, schools, CCTV network, streetlights, water supply, and its gram panchayat office.

This is the story of a small farming community that didn't just install solar panels--they started their own solar power company. And in doing so, they didn't just light up homes; they sparked ...

While large-scale solar projects often make headlines, residential or home solar systems are also rapidly advancing. These systems, often off-grid, are installed on rooftops or in courtyards ...

Rows of solar panels were installed, and beneath them, villagers grow crops and raise livestock. From July 2016 to June this year, the station generated 3.19 million kW of electricity, which ...

Under the pilot program, the banner government plans to install solar panels on more than 3.3 million square meters of rooftops, providing a total capacity of 243 MW. After the pilot program is completed, ...

Nearly 300 households in this village have equipped their rooftops with distributed photovoltaic solar panels. Besides photovoltaic power, Liyin also makes full use of hydropower.

Install solar power systems in 50 villages within three years. Provide sustainable energy to 10,000 households and community centers. Reduce greenhouse gas emissions by replacing diesel ...

In Chaideng village in Ordos city, Inner Mongolia autonomous region, 3.46 million blue solar panels stretch across the desert, covering 30 square kilometers, transforming the endless ...
