

In 2011 the Cypriot Energy Regulatory Authority (CERA) announced a number of steps aimed at facilitating development of photovoltaics in Cyprus. Among them is the large-scale application of net ...

Cyprus is rapidly embracing energy storage solutions to support its renewable energy transition and ensure grid stability. This article explores the latest advancements, challenges, and opportunities in ...

Current plans by the Electricity Authority of Cyprus (EAC) involve installing storage systems at Dhekelia and Moni power plants, projected to stabilize the grid significantly. This ...

A recent scientific article published in *Renewable and Sustainable Energy Reviews* in 2014 by Prof. Mete Feridun of University of Greenwich in London and his colleagues investigates the long-run equilibrium relationship among international tourism, energy consumption, and carbon dioxide emissions (CO<sub>2</sub>), and the direction of causality among these variables. The authors report evidence that international tourism is a catalyst for energy consumption and for an increase in the level of carbon dio...

Cyprus is set to build its first large-scale electricity storage system within the next 16 months, according to Energy Minister George Papanastasiou. This move is key to supporting ...

In May 2025, Cyprus successfully commissioned its first significant battery energy storage system (BESS), marking a major step toward enhancing the country's energy infrastructure and ...

Whether you're a homeowner considering rooftop solar+storage or an investor eyeing utility-scale projects, one thing's clear - Nicosia's energy storage field isn't just about storing electrons.

As solar energy production increases in Cyprus, energy storage solutions are becoming an important component of the renewable energy landscape. Battery storage systems allow excess electricity ...

Cyprus is poised to introduce large-scale renewable energy storage solutions by 2026, a move aimed at addressing the nation's increasing demand for effective energy management.

Cyprus will begin implementing renewable energy storage systems in 2026 at the earliest, Energy Minister George Papanastasiou announced during parliamentary discussions on Tuesday, ...

It said the government will be deploying centralised energy storage systems and at the same time launched a public consultation into how best to direct funding to support renewable ...
