

# Czech solar power generation for home use

Solar power, particularly from small rooftop installations, grew by 28.4%. Concurrently, electricity consumption fell by 2.3%, with households reducing usage the most.

What is Czech Republic Solar Energy? Solar energy in the Czech Republic refers to harnessing sunlight to generate electricity through photovoltaic (PV) panels and solar thermal systems.

Now, by doubling it again, Czechia is making it easier for homeowners, companies, and communities to install solar panels without needing extra licences. The new law also brings clarity to ...

- In Jan 2023 Czech Parliament approved an amendment of Energy Law enabling from Feb 2023: streamlining of permitting procedures for new PV plants with capacity over 1 MWp incl FPV

Czechia installed 357 MW of solar power during the first half of 2025, according to the Czech solar association Sol&#225;n&#237; Asociace. This includes 200 MW in the commercial and industrial ...

The Czech Republic had almost two gigawatts (GW) of photovoltaic capacity at the end of 2010, but installed less than 10 megawatts (MW) in 2011 due to the feed-in tariff being reduced by 25%, after installing almost 1,500 MW the year before. Installations increased to 109 MW in 2012. In 2014, no new installations were reported. Source: Photovoltaic Barometer: Energy-Charts , Fraunhofer Institute for Solar Energy Systems

Commercial and industrial buyers accounted for 40.3% of the Czech Republic Solar Energy market in 2025, leveraging power-price hedges and third-party finance. The residential ...

In the Czech Republic, the use of solar energy is rapidly increasing -- in 2023, the country installed nearly 83,000 new solar power stations. For comparison, in 2019, just over 3,400 ...

In 2023, solar power generation capacity across all projects in the Czech Republic will reach nearly 3.5GW. There are more than 170,000 grid-connected solar projects, of which more than ...

Get the latest Czech energy news. The government is revamping its solar energy strategy with new subsidies and streamlined laws to boost renewables. [Learn more.](#)
