What is the energy sector like in the Czech Republic?

The Czech Republic's energy sector is characterized by a diverse mix of sources. The primary source of electricity in the country is coal, which has historically played a central role in its energy production. Coal-fired power plants continue to be a significant part of the energy landscape, despite global trends moving towards renewable sources.

How much energy does a shower save in Czech Republic?

With the energy-saving shower, you can save up to 50% energy compared to standard shower heads. Or you can shower half the time. With the electricity price today in Czech Republic you can save 0.30 EUR for each shower. Heating is one of the things that consumes the most electricity in a typical home.

What are the key components of the Czech Republic's electricity mix?

Nuclear energy is another key component of the Czech Republic's electricity mix. Nuclear power plants, notably the Temelín and Dukovany facilities, provide a substantial portion of the country's electricity, highlighting its importance in the national energy strategy.
