

The operating rate of PV extrusion declined. According to the SMM survey, some small and medium-sized enterprises in Anhui reported that due to poor profitability of PV extrusion, they were gradually ...

According to the China Photovoltaic Industry Association (CPIA), prices across all segments of the solar panel supply chain have plunged 60-80% from their 2023 peak. Among 121 listed Chinese solar ...

The Xinghuo Water Surface Photovoltaic Demonstration Project of Daqing Oilfield, China National Petroleum Corporation's first water surface photovoltaic project designed and built independently, has recently begun ...

Chinese solar overcapacity has led to a steep plunge in new projects to manufacture solar energy materials and components in the first half of the year, while also sparking off a wave of bankruptcies.

Preliminary financial results from three Chinese manufacturers show a downward trend across the solar manufacturing industry over 2024.

Since 2024, more than 40 solar firms have delisted, gone bankrupt or been acquired, according to a presentation by the photovoltaic industry association in July.

Signed into law by President Biden in December 2021, the UFLPA places a ban on all solar product imports from the Xinjiang Uyghur Autonomous Region (XUAR) of China, unless products are ...

Contact the manufacturer of your solar panels or system components for warranty support. Seek alternative local contractors who might take over service agreements.

When a 2024 typhoon ripped through coastal solar farms, Daqiuzhuang Photovoltaic Bracket installations stood firm while conventional arrays collapsed like house of cards.

Thousands of homeowners found themselves mid-installation when their solar contractor closed up shop. These customers faced serious challenges, including incomplete systems, permitting issues, and ...
