

The electricity sector of Uruguay has traditionally been based on domestic hydropower along with thermal power plants, and reliant on imports from Argentina and Brazil at times of peak demand.

- Uruguay's Energy Companies: UTE dominates Uruguay's electricity market, supplying 63% of the country's power, including hydro and wind. ANCAP leads oil and gas, managing exploration, refining, and distribution. ...

UTE (Administración Nacional de Usinas y Trasmisiones Eléctricas) is responsible for the electrical grid of Uruguay including generation, transmission, distribution, commercialization, and technical assistance.

Statistics on the electricity network in Uruguay from OpenStreetMap.

Access to electricity (% of population) - Uruguay IEA, IRENA, UNSD, World Bank, WHO. 2023. Tracking SDG 7: The Energy Progress Report. World Bank, Washington DC. © World Bank. License: Creative Commons ...

Uruguay excels in energy equity, mainly thanks to its near-universal electricity access across the country (more than 99% of the population in the past 15 years).

Uruguay's National Administration of Power Plants and Electrical Transmissions, better known as UTE, owns and operates the transmission, distribution, and sale of electricity.

Unlike other energy commodities such as coal, oil and natural gas, electricity trade between countries is relatively limited as it is more technically complex and requires a direct cross-border interconnection.

Este informe aborda distintos aspectos relacionados a las actividades de transmisión y distribución de electricidad en Uruguay y está organizado de la siguiente manera:

Fuel MixGreenhouse Gas Emissions TargetsGovernment Energy Agencies & Other Key PlayersElectricity UsageCoal in UruguayOil & Natural Gas in UruguayRenewable Energy in UruguayIron & Steel in UruguayEnvironmental & Social Impacts of Energy in UruguayUruguay's rate of electricity generation from renewables (98%) is among the highest in the world, with wind and hydropower leading the way. Wind power growth has been especially strong in recent years, with wind-generated electricity surpassing hydro in 2020 for the first time in Uruguay's history. In 2021, Uruguay generated 47% of its electricity ...See more on gem.wiki.b_wpt_bl .b_tranthis{margin-left:8px;font-size:14px}.b_algo .b_tranthis{margin-top:1px;margin-left:8px}.b_algo
