

Explore the technical codes and standards applied in the electricity sector to ensure top-tier quality, safety, and protection in the delivery of electrical services.

These standards and protocols cover communication between EV charging central systems and charging stations, primarily for infrastructure monitoring and management.

Our findings revealed that the nationwide electricity consumption would reduce to 54,101.60 GWh due to the operation of communication base stations (95% CI: 53,492.10-54,725.35 GWh) (Figure 2 C), marking a ...
