

# Energy storage ratio of the Middle East power grid

Is large-scale energy storage a viable option in the Middle East?

Until recently, large-scale energy storage was barely a consideration in the Middle East, where fossil fuels have long dominated power generation. With renewable energy projects expanding across the region, energy storage has started gaining traction.

What happened to the Middle East's energy sector in 2025?

In 2025, the Middle East's energy sector held firm amid cooling global markets, geopolitical friction, and an uneven global energy transition. The region continued to underpin global supply, producing roughly 30 percent of global oil and 17 percent of natural gas, according to the International Energy Agency (IEA).

Is energy storage gaining traction in the Middle East?

With renewable energy projects expanding across the region, energy storage has started gaining traction. Unlike Europe, North America, and Asia, where renewable energy and storage technologies are well-established, the Middle East remains in the early stages of development.

What is changing in the Middle East's power sector?

This thought-provoking report will broaden the understanding of any audience confronting the changing dynamics of the Middle East's power sector. The power market is transforming as energy independence and economic diversification play a bigger role.

The Middle East and Africa (MEA) Energy Storage Outlook analyses key market drivers, barriers, and policies shaping energy storage adoption across grid-scale and distributed segments. ...

The energy storage market in Oman and Kuwait, including batteries, is expected to grow in the coming years due to the increasing demand for renewable energy and the need for backup ...

A healthy energy mix of renewables and natural gas will achieve the optimal grid stability to supply uninterrupted power to the region's industries and homes. This will include energy storage solutions ...

In this article, Saqib Saeed, Chief Product Officer at PTR Inc., and Siddiqa Batool, Analyst at PTR Inc., analyze the crucial role of energy storage in shaping the Middle East's power sector. With countries ...

Until recently, large-scale energy storage was barely a consideration in the Middle East, where fossil fuels have long dominated power generation. With renewable energy projects expanding ...

The Middle East and North Africa (MENA) region is stepping up its clean energy efforts, with renewable investment growing steadily. According to the World Energy Investment 2025 report ...

The transformation of the energy structure in the Middle East is accelerating, and the demand for new energy storage is strong. Major countries attract investment in energy storage ...

## **Energy storage ratio of the Middle East power grid**

The Future of Electricity in the Middle East and North Africa - Analysis and key findings. A report by the International Energy Agency.

In 2025, the Middle East's energy sector held firm amid cooling global markets, geopolitical friction, and an uneven global energy transition. The region continued to underpin global ...

With over a decade of experience in the Power Grid and New Energy sectors, PTR Inc. has evolved from a core market research firm into a comprehensive Strategic Growth Partner, ...
