

In a groundbreaking step toward sustainable energy solutions, Finland has unveiled the world's first industrial-scale sand battery. This innovative energy storage system, developed by ...

Sungrow, the global PV inverter and energy storage system provider, has announced the deployment of the 60 MWh battery storage project in Simo, Finland. The project, one of the northernmost battery ...

Aug 11, 2025 &#183; Sungrow, a China-based PV inverters and energy storage systems provider, has successfully deployed a 60MWh battery storage project in Simo, Finland.

Sungrow supplies 180 SG350HX inverters to one of Finland's largest and northernmost solar plants in Simo, supporting Arctic-ready clean energy.

Finland is poised to lead the charge in the space, it being the world's only country capable of managing the entire battery value chain from mineral extraction to recycling.

The town recently switched on what's now the world's largest "sand battery", a deceptively simple system built by Finnish startup Polar Night Energy that could help solve one of the ...

Simo, Finland, May 16, 2025 -Sungrow,the global leading PV inverter and energy storage system provider, announces the successful deployment of the 60MWh battery storage project in Simo, Finland.

The transition in Finland from heavily governmental subsidized wind power production has been rapid due to improved technology and taller towers, which enables the utilization of better wind ...

The installation is the first large-scale battery in the Nordics to meet the new grid-forming requirements set by Finland's transmission system operator Fingrid, which only published its ...

Hitachi Energy has signed an agreement with Nordic Electro Power (NEPower) to provide advanced power conversion technology for Finland's largest battery energy storage system ...
