

MET Group installed a battery energy storage system of 40 MW and a two-hour duration at its gas power plant Dunamenti near Budapest. The company said it is the largest BESS in Hungary.

Portuguese renewables group Greenvolt has inked a EUR-58.9-million (USD 69m) project finance deal for a 99-MW/288-MWh standalone battery energy storage system (BESS) in ...

Hungary's subsidy scheme for energy storage will drive huge growth in battery energy storage system (BESS) deployments over the next few years.

Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition.

This in-depth white paper from Solarplaza unpacks Hungary's rapid energy storage evolution, from the country's first national BESS auction and new co-location rules to a restructured ...

To address these challenges, the development of battery energy storage systems (BESS) co-located with solar power plants (i.e. cable pooling) has become increasingly important.

Hungary's largest operating standalone battery energy storage system (BESS) has been inaugurated today. MET Group put into operation a battery electricity storage plant with a total ...

With this latest BESS plant, which went into operation, MET Group and the Dunamenti Power Station are further strengthening their contribution to the energy transition in Hungary.

The 40-megawatt BESS will be integrated with other clean-energy additions at the facility, including solar power generation, upgraded gas turbine units, and electric boilers with energy ...

The inauguration of Hungary's largest BESS represents a pivotal moment for the nation's energy sector. As Hungary strives to meet its renewable energy targets and reduce its reliance on ...
