

For hydrogen to become established as an energy source, a well-functioning infrastructure is needed to store and transport it. Launched in Berlin in early May 2025, the ...

Hydrogen can also transport energy and offers a possible solution to the storage problem of renewable energy. Our hydrogen agenda is to produce green hydrogen from Berlin's capital, use it as an energy ...

White Paper: A hydrogen market requires a storage strategy of Andreas Lohse | May 14, 2025 | Politics (Berlin, Germany) - Hydrogen storage ensures that surplus energy from renewable ...

With its proximity to the Berlin metropolitan region and the hydrogen pipelines, EWE's gas storage site in Rüdersdorf is geographically ideally located for the development of the hydrogen ...

Besides the wind park, the multienergy station also incorporates an on-site wind hydrogen production facility (electrolysis, compression, storage) with a modular extendable capacity from 0.5 t to 1 t of ...

As an energy carrier with a high energy density and long-term storability, hydrogen will play a major role in achieving energy system transformation. However, the Land of Berlin has so far hardly any ...

The German Parliament (Bundestag) has now approved a legal amendment that would classify battery, heat, and hydrogen storage as privileged developments in non-urban areas under ...

The Brandenburg Hydrogen Storage Program (2024) promotes the production, use and distribution of renewable hydrogen as well as the storage of renewable electricity in chemical, mechanical or ...

Berlin, August 5, 2025 - The global high-pressure gas storage market is undergoing transformation under EU's Renewable Energy Directive III. IEA reports composite cylinder market will reach \$8.7 ...

By examining various crucial elements within the energy system, including electrolyzer capacity, hydrogen demand and profile, and hydrogen import restrictions, this work provides a ...
