

Where can I buy a solar generator?

Get the EcoFlow solar generator at Amazon (1 solar panel), Lowe's (solar panels sold separately), The Home Depot (solar panels sold separately), or EcoFlow (1 solar panel).

How do I choose a solar generator?

When choosing a solar generator, two key specs matter: watt-hours (Wh): How much energy it can store. continuous wattage output (W): How much power it can deliver at once. For example, small portable generators might offer 200-500 Wh, enough for charging phones, lights, or a small fan. Battery chemistry also matters.

How much does a solar generator cost?

Adding more to the generator's overall value, the accompanying solar panel has up to 22% solar-conversion efficiency and is compatible with most power stations and portable solar generators. Priced at under \$300, the power station and its 299Wh LiFePO4 battery pack offer up to 3,500 charge and discharge cycles.

Should you buy a home generator?

To be safe, it's best to invest in a home generator that can provide backup power as needed. While many bigger home generators run on liquid propane or gas, there are a number of newer models that run on solar energy.
