

My country's annual wind power generation

But how effective is wind power, how much are we using it, and which countries lead the way? How does wind energy compare to other energy sources, and what are its pros and cons? ...

Renewables 2025 Global Status Report Collection. A comprehensive annual overview of the state of renewable energy.

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can find more about Ember's methodology in this ...

Kenya is building a wind farm, the Lake Turkana Wind Power (LTWP), ...

While global growth slightly slowed, the steady and inspiring rise of wind power in countries like China and Brazil gives us renewed optimism. China, in particular, has shown ...

Offshore Wind Farm Announced, Pre-construction, and Construction Capacity by Country/Area and Year (MW) February 2026

Also includes information on each country's actual yearly production of wind-generated electricity, as well as the amount of electricity generated in offshore wind farms as compared on onshore farms.

Kenya is building a wind farm, the Lake Turkana Wind Power (LTWP), in Marsabit County. As Africa's largest wind farm, the project will increase the national electricity supply while creating jobs and ...

Wind energy generation by region Measured in terawatt-hours. Includes both onshore and offshore wind sources.

Official statistics by year of wind power generation (TWh). The values are presented in tables and charts with calculations of changes and shares, and with extensive analytical functionality.

These countries demonstrate that the world as a whole can achieve a 40-50% share of wind power in total electricity generation, as outlined by the WWEA in a long-term scenario.
