

The 70 MW/140 MWh BESS project will be located in Nivala, northern Finland. Set to go online in 2026, the facility will enhance grid stability, energy resilience and accelerate green ...

The Nordic region, with Sweden at the forefront, is entering an era of rapid BESS deployment. Historically, installations have focused on 1-2 hour systems, but the trend in continental ...

From container placement to electrical installation. Discover how utility-scale storage provides flexibility and enhances grid value. Excess energy is stored during periods of surplus supply and then ...

SEB Nordic Energy's portfolio company Locus Energy, in collaboration with Ingrid Capacity, proudly announces the groundbreaking of one of Finland's largest battery energy storage ...

Merus Power, together with Alpiq, has achieved a historic milestone for the Nordic energy market: the delivery of the region's first grid-forming battery energy storage system (BESS).

BESS will have a large impact on energy systems in the Nordics, helping the move toward carbon neutrality. However, ignoring the specific needs for BESS installations in the region ...

Discover how the Port Electrification BESS Container is revolutionizing European maritime hubs--slashing diesel use, cutting emissions (like Rotterdam's 8,400 tons/year), saving millions ...

International developer and IPP Nordic Solar has entered the BESS market with a 10MWh project on home soil, in Denmark. The BESS will be in Borup in the municipality of Hillerod ...

Construction has begun on Sweden's largest Battery Energy Storage System (BESS) undertaken by Neoen, an Independent Power Producer and Nidec, a system integrator.

While Norway once aimed to be the "battery of Europe" it has since been overtaken other Nordic countries Sweden and Finland for BESS deployments. Research firm LCP Delta's Jon Ferris ...
