

This Northern Europe project implements a large-scale containerized energy storage solution to support utility-scale energy storage and grid stability.

Nordic Booster and Scania Pilot Partner have developed a circular energy-storage system that gives used electric truck batteries a second life--delivering cost-effective, secure, and ...

Our battery energy storage solutions are designed, developed, and manufactured in Finland. From inverters to control and protection systems, everything is crafted locally to ensure high-quality ...

Computer-generated picture of the future battery storage park in Finland. SEB Nordic Energy's portfolio company, Locus Energy, in collaboration with Ingrid Capacity, will build the largest ...

This transaction supports the company's ongoing ambition to accelerate the transition to renewable energy in the Nordic region. The 10MW BESS will be strategically located in SE3, helping ...

The battery facility in R&#228;tvik has a capacity of 12MW/12MWh and is part of a larger partnership with Locus Energy, through which the companies jointly develop and own ...

Battery-based energy storage is a vital addition to the Nordics' energy system to integrate an even higher share of renewable energy from abundant wind and hydropower.

During 2025, Locus Energy has taken significant steps in its Nordic expansion. Earlier this year, a groundbreaking ceremony was held for a 70 MW/140 MWh battery energy storage ...

With advanced lithium-ion battery technology and intelligent control system, our eBESS battery container offers a scalable and modular energy storage solution that is easily expandable as energy ...
