

Baringa's Nordics Reference Case Report covers our quarterly-updated projections of wholesale power prices, generation-weighted average captured prices for solar and wind as well as ELCERT prices to ...

Battery Energy Storage Systems (BESS) lead the Nordic energy storage market in 2025, making up about 40-50% of the total market value. Lithium-ion technologies head this segment, ...

The Nordic countries have set ambitious targets for implementing renewable energy sources and energy storage, which will move them closer to a sustainable fossil-free energy system.

This article explores the Nordic energy storage market's unique opportunities, technological innovations, and practical applications for commercial and industrial users.

Presents our annual projections for wholesale electricity prices out to 2060 for our three internally consistent scenarios (High, Central and Low). AFRY's modelling of the Nordic countries includes 20 ...

2026 marks a historical pivot point for homeowners and industrial operators seeking energy independence. For years, the high energy storage price served as a barrier, keeping all but the most ...

Lapland's off-grid communities paid even more during polar nights when solar generation dropped to zero. What's causing this volatility, and how can energy storage stabilize both prices and supply?

Onshore wind and PV gained momentum in 2022 due to high electricity prices and supply security concerns. However, regular negative power prices reveal the challenges of integrating wind and ...

Real time map that shows the power exchange and prices between the different price areas in Denmark, Sweden, Finland, Norway, Estonia, Latvia and Lithuania.

In the Nordic countries (Denmark, Sweden, Norway & Finland), renewable energy (RE) already makes up more than half of the generation mix in each country. The high penetration of RE ...
