

North Macedonia has recently adopted a new Law on Energy designed to improve the planning of new generation and storage capacity. Several rulebooks and secondary legislation are now required to ...

Countries in Europe, Asia, and North America ramped up efforts to transition away from fossil fuels, with ambitious goals to expand clean energy capacity into the future.

The Australian-Singaporean group behind a proposed 20 GW solar PV farm and 42 GWh battery energy storage project under development in Australia's remote far north has hinted that other, similar ...

Focusing on technological advancements, market evolution, and the current business case for storage, we will discuss how storage is already being used to support reliable power supply, what makes it ...

Under the direction of the national "Guiding Opinions on Promoting Energy Storage Technology and Industry Development" policy, the development of energy storage in China over the past five years ...

Let's face it--North Asia's energy landscape is at a crossroads. With China's renewables capacity hitting 1,200 GW last quarter and Japan accelerating nuclear reactor restarts, you'd think we've got this ...

Imagine your smartphone dying during a video call - that's essentially what happens when power grids can't store renewable energy effectively. North Asia's new energy storage policies ...

How will a new energy policy affect the energy sector? It will continue to support PPPs and independent power producers as vehicles for attracting private capital into the energy sector.

The need to reduce greenhouse gas emissions has catalysed the rapid growth of renewable energy worldwide. However, the intermittent nature of renewable energy requires the support of energy ...

Summary: Explore how North Asian countries are shaping photovoltaic energy storage policies to meet renewable energy targets. Discover regional initiatives, data-driven insights, and emerging ...
