

What is an off-grid system?

From wilderness homesteads to urban apartments, off grid systems adapt to any setting. Compact setups power RV adventures, while robust systems support full homes. Solar appliances enhance comfort, making off-grid living practical and enjoyable.

What is an off-grid Solar System?

An off grid solar system is a standalone power generation setup that operates independently from the electrical grid. Unlike grid-tied systems that can sell excess power back to utilities, off-grid systems store all generated electricity in batteries for use when the sun isn't shining. The system consists of four main components working together:
