Solar PV accounted for 5.4% of total global electricity generation, ...

Many studies were done to explore strategies for improving the effectiveness of photovoltaic systems (solar panels). Due to the distinct benefits of piezoelectric generators, they ...

We develop advanced III-V solar cell technology and share our results by publishing in high-impact journals and transferring the resulting intellectual property to industry.

The feasibility of the triple-generation system is proved in the experiment. A low-concentrating photovoltaic/thermal triple-generation system for heating, cooling and electricity is ...
