

WASHINGTON, D.C. -- The U.S. Department of Energy (DOE) has selected NextEra Energy Resources Development, LLC, to enter realty negotiations for a carbon-pollution-free ...

Pilot Energy has confirmed the receipt of a non-binding proposal from EDP Renewables APAC for the acquisition of the Three Springs solar photovoltaic power plant in Western Australia ...

This paper provides an overview of a next-generation particle-based concentrating solar power (CSP) system. The Gen 3 Particle Pilot Plant (G3P3) will heat particles to over 700 °C for use in high ...

Concentrating solar power (CSP) projects in United States are listed below alphabetical by project name. You can browse a project profile by clicking on the project name. You can also access ...

The Department of Energy (DOE) has broken ground on the Generation 3 Particle Pilot Plant (G3P3), a novel concentrating solar power (CSP) facility at Sandia National Laboratory that will ...

A presentation of a pilot project introducing a solar photovoltaic system with an energy storage system (BESS) in the commercial sector was held in Bishkek. The project was implemented ...

Lawrence Berkeley National Laboratory compiled and synthesized empirical data on the U.S. utility-scale solar sector. The focus is on ground-mounted systems larger than 5M AC, including ...

In our STEO forecast, utility-scale solar is the fastest-growing source of electricity generation in the United States, increasing from 290 BkWh in 2025 to 424 BkWh by 2027. Almost 70 ...

If selected to advance to Phase 3, the team will validate the ability to meet the Solar Energy Technologies Office CSP cost and performance goals through construction of a pilot-scale test facility.

This demonstration is the culmination of a \$100 million research effort to develop next-generation concentrating solar-thermal power (CSP) plants and showcase storage technology that ...
