

With the launch of Walo Storage, Senegal's energy sector enters a new era of sustainable solar power and reliability.

Halliburton opens a multi-service operations base in Senegal to support deepwater projects, boost local content, and expand West Africa energy services.

Renewable energy company Africa REN has started construction of the Walo Storage project - a lithium-ion battery energy storage system situated in northern Senegal.

By combining photovoltaic generation with lithium-ion batteries, the facility delivers 13 MW of power for frequency support and emergency supply. This technology not only enhances grid ...

Africa REN will construct and operate the facility under a 20-year power purchase agreement (PPA) designed to solve issues associated with intermittent energy supply, a key challenge of integrating ...

Combining photovoltaic solar with a storage system is a unique solution to meet the current and future needs of the grid. In order to complement and intensify our local impact, Walo Storage is committed ...

Africa REN has started construction of the 10MW/20MWh Walo battery energy storage project in Senegal. The Dutch development bank FMO and the Emerging Africa Infrastructure Fund ...

The on-time commissioning of Walo Storage demonstrates our ability to support Senegal's energy transition using cutting-edge technology. It is also a key milestone in our ambition to build ...

A subsidiary of the French concession and construction firm Vinci, Omexom, will build the plant and its electricity will be sold to state-owned utility, SENELEC, which is a shareholder in ...

Senegal has officially inaugurated the "Walo Storage" plant in Bokhol (Saint-Louis Region) on January 22, 2026. This marks a technological milestone as West Africa's first large-scale ...
