

Should we put down the cabinet for solar energy

Should solar worry about the new Secretary of Energy under Trump 2.0? A look back at DOE's solar agenda over four presidencies.

Many of the new solar component plants are in states that voted for Trump in 2024, and manufacturers say the administration just needs to stay the course to foster the industry.

A 1960s-era law is being deployed to support the 21st century solar power movement, despite the recent U-turn in federal energy policy.

With falling solar panel costs, rising electricity prices, and the growing importance of personal energy independence, solar continues to deliver major financial benefits in the form of tens ...

Will permitting and transmission delays of a decade or more be eased, especially in California, or will pushback from rural Republicans and a president who denies climate change dim ...

Days after Republicans in Congress passed a wide-ranging law that slashed tax breaks for wind and solar energy, new moves from the Trump administration have added a fresh layer of ...

President Trump has long expressed disdain for renewable energy, especially wind. He said before taking office that he'd like to see no new wind energy be constructed during his tenure.

Solar executives and analysts are urging Senate Republicans to challenge the House bill and preserve clean-energy incentives, warning that the loss of tax credits could lead to economic...

Now, that GOP spending bill of President Trump's that passed the House, that would end federal tax credits for solar and other types of clean energy. We wondered what the effects might be ...

Even as the Trump administration rolled out a series of anti-clean energy policies, solar and storage still accounted for 82% of all new power added to the grid in its first six months.

Should we put down the cabinet for solar energy
