

But the electricity mix -- the balance of sources of electricity in the supply -- is becoming increasingly important as countries try to shift away from fossil fuels towards low-carbon sources of electricity (nuclear or ...

Primary energy use in Slovakia was 194 TWh and 36 TWh per million inhabitants in 2009. [1] Slovakia has a plan to get renewable sources of energy up to 19.2% by 2030. [3] From 2024, following the completion of two ...

Energy production includes any fossil fuels drilled and mined, which can be burned to produce electricity or used as fuels, as well as energy produced by nuclear fission and renewable power sources such as hydro, wind ...

Slovakia's electricity mix includes 66% Nuclear, 13% Hydropower and 10% Gas. Low-carbon generation reached a record high in 2025.

Discover data on Electricity Generation: by Type of Fuel in Slovakia. Explore expert forecasts and historical data on economic indicators across 195+ countries.

As of 2022, Slovakia registered about 217 small-scale hydropower plants up to 10 MW with a total installed capacity of 81.6 MW. Sources: EU Commission Energy Statistics of the EU-27 Countries (2025); World ...

Track real-time and historical electricity data worldwide -- see production mix, CO2 emissions, prices, cross-border exports, and much more.

Slovakia: Fossil fuels electricity generation, billion kilowatthours: The latest value from 2023 is 4.16 billion kilowatthours, a decline from 4.75 billion kilowatthours in 2022. In comparison, the world average is 92.45 ...

Slovakia's energy mix in 2022: share of individual energy sources in total electricity generation (defined according to Energy Act) ... Slovakia's future energy mix will take into account three pillars - security of ...

From 2024, following the completion of two new nuclear reactors, Slovakia will return to being a net exporter of electricity. Slovnaft is the largest oil refinery in Slovakia. In 2022 Slovakia sought to reduce its reliance on oil from Russia. Slovensk&#253; plyn&#225;rensk&#253; priemysel (Slovak Gas Industry, SPP) is the main natural gas supplier in Slova...

Electricity generation remained stable at 30 TWh, with nuclear leading, followed by hydro and gas. The country is a net electricity exporter, primarily to Hungary and Ukraine.
