

The EIB is providing a EUR 33 million loan for KEK's solar power project of 120 MW in peak capacity on its former coal ash dump.

The energy strategy foresees 170 MW in battery operating power. In addition, procedures are scheduled to be announced in the fourth quarter for a solar power plant of 100 MW for government-controlled ...

The EIB is providing EUR33 million for the construction of one of Kosovo's largest solar photovoltaic plants. The new plant will contribute to higher energy security and the phasing out of ...

Government-controlled Kosovo Energy Corp. (KEK) said it is preparing to start building its Solar4Kosovo 1 photovoltaic plant near Prishtina. It informed the local community that agricultural ...

While the increase of the solar PV installed capacity limitation marks a crucial step in the evolution of solar energy utilization in Kosovo, it is still insufficient, especially for industrial and large ...

A photovoltaic system is being built on the areas where ash from the two coal-fired power plants at Kosovo A was previously deposited. It will have an installed capacity of up to 100 MW and produce ...

This separate project, to be built on a closed landfill, demonstrates the EU's ongoing commitment to supporting Kosovo's transition to renewable energy. The launch of the Solar4Kosovo ...

Solarvance provides efficient, cost-effective solar and storage solutions optimized for Kosovo's continental climate. Our systems deliver reliable performance, helping homes, businesses, and ...

As a result, the share of solar power in the energy mix of Kosovo will increase from 0.2% to 2.3%. The plant is expected to produce around 152 GWh of electricity and save 152,000 tonnes of CO2 annually.
