

Solar energy is crucial for Romania to meet its decarbonisation goals and to contribute to the European Union's 2050 climate neutrality trajectory. The REPowerEU initiative sets ambitious targets, aiming ...

Romania has been a focal point of renewable energy discussions in Eastern Europe, with ambitious goals set for its solar power sector. The year 2025 was marked as a potential milestone for ...

Prosumers have long been the dominant factor in the solar power boom in Romania. Last year, utility-scale investments took the lead. Interestingly, in the prosumers segment, residential ...

Romania's prosumer solar market continued its rapid growth toward the end of 2025, with nearly 290,000 registered prosumers and installed capacity surpassing 3.3 GW, according to the ...

Romania is on track for record solar deployment in 2025, driven by subsidies for residential and commercial and industrial systems and a more favorable framework for utility-scale ...

The regional distribution of large-scale PV projects in Romania reveals a notable concentration in certain counties, indicating areas with favorable conditions for solar energy development.

With an average of 1,900 to 2,400 annual sunlight hours, Romania has significant natural potential for solar PV development. Yet, the country has not set ambitious targets for renewable energy sources, ...

The document encompasses three dimensions: (i) facilitating the deployment of solar PV, (ii) access to sustainable solar products, and (iii) strengthening cooperation in the field of solar energy, ...

Learn about the current state, policies, and potential of solar energy in Romania, one of the top ten solar markets in Europe. Find out how the government, EU ...

Romania achieved a record high of 1 GW of new solar capacity in 2023, driven by simplified permitting and subsidies for prosumers. The market faces some challenges, such as grid connection and land ...

Romania's revised NECP draft outlines modest growth targets for solar power capacity but this below the country's solar potential and lacks specificity and concrete measures for achievement. Proposed ...

A report on the current situation and future prospects of the photovoltaic sector in Romania, with the support of ANRE, EBRD, RPIA and CIGA Energy. It covers the EU and national policies, the supply ...

This article will delve into Romania's solar landscape, providing a comprehensive overview of the current

state of the market, government policies, and incentives, as well as the potential for future growth.
