

A solid is a substance that stays the same shape whether it is in a container or not. Solids turn to liquids at certain temperatures.

Because its particles are packed close together, a solid is rigid, doesn't flow, and isn't easily compressed. A solid is defined as a state of matter with a definite shape and volume.

A solid forms from liquid or gas because the energy of atoms decreases when the atoms take up a relatively ordered, three-dimensional structure. Solids exhibit certain characteristics that ...
