

The Department of Energy Office of Electricity Delivery and Energy Reliability Energy Storage Program would like to acknowledge the external advisory board that contributed to the topic identification, ...

Battery energy storage systems (BESS) are growing rapidly on the U.S. grid, but the technology has faced some headwinds. The primary technology being installed, lithium-ion storage ...

A battery storage system in Moss Landing, California caught fire in January, sending plumes of toxic smoke into the atmosphere and forcing the evacuation of about 1,500 people.

All of the states with a storage policy in place have a renewable portfolio standard or a nonbinding renewable energy goal.

Residents have opposed a proposed 180-megawatt battery energy storage system, citing risks to their water supply and rural character.

Energy storage projects are facing increasing scrutiny from local residents in parts of the U.S. Residents have voiced concerns about fires at energy storage facilities - in particular, lithium ...

This report provides a comprehensive framework intended to help the sector navigate the evolving energy storage landscape. We start with a brief overview of energy storage growth.

But right now, the rise in community opposition, driven by misguided safety concerns and isolated BESS fires, is having a real and significant impact and stalling the construction of important ...

Gov. Kathy Hochul's plans for the Empire State to go green are going south as local communities refuse to build massive battery plants that would store wind and solar energy.

Massachusetts is making a big push for batteries -- not the kind you put in a flashlight, but powerful, tractor trailer-sized batteries that store energy for the electric grid.
