

Who makes low voltage switchgears?

Max. The company offers low voltage switchgears as part of its industrial automation solutions. The company specializes in designing innovative electrical systems and is currently engaged in constructing two medium voltage (MV) switchgear stations for a Battery Energy Storage System (BESS) project.

What are MV switchgears?

Are suitable for feeding devices and motors and are characterized by having the components of each functional unit arranged into cubicles that are separated by metallic segregations, that are usually dedicated to disconnection, protection and measurement. These MV switchgears could: Be designed to withstand an internal arc.

What is ATR switchgear?

ATR is an air-insulated (AIS),metal enclosed medium voltage switchgear,mainly used for secondary distribution power systems. Il Gruppo IME has been a key player in the industrial switchgear market since 1962,specializing in medium and low voltage switchgear and electromechanical systems.

What is a metal-clad MV switchgear?

The metal-clad M.V. switchgear has a structure composed by one or more compartments for specific functions,as determined by the needs and system configuration. This M.V. switchgear withstands internal arc proof and it is designed with conduits vent for smoke,produced by internal arc,as per standard requirements.
